

UNISOL DA

Degreasing agent. Combination of Ethoxylated surfactants

Typical Analysis

Appearance	: Thick colorless liquid
pH (10% sol.)	: 6.5 ± 0.5
Active Substance	: $65 \% \pm 2$
Ionic Character	: Non-Ionic

Properties

Unisol DA is an excellent degreasing agent and can be used for all types of leather but mainly for double face. Also washing power of wool is very strong. Leathers treated with **Unisol DA** are not structurally weakened and have always fine grain. **Unisol DA** is recommended during soaking and also liming process for opening the fibers.

Application

Unisol DA can be used 4 - 7% for degreasing for double face and sheep skins. It is recommended for soaking around 0.5 - 0.7% and also for liming 0.2 - 0.4%.
