

UNISIN ML

Melamine based resin

Typical Analysis

Appearance	: White Color Powder
pH (10% sol.)	: 6.5 ± 0.5
Active Substance	: 96 %
Ionic Character	: Anionic

Properties

UNISIN ML improves notably the fullness of the leather, depositing and fixing itself in those parts where the structure is emptier. The skins retanned with **UNISIN ML** have excellent capacity to dyeing. Its employment does not modify the shades or the intensity of color.

Application

UNISIN ML can be introduced in the neutralizing float, together with other products of anionic character or combination with vegetable extracts. **UNISIN ML** is recommended for sheep skins for nappa between 2-5 % for shoe-upper leather between 3-6 % on shaved weight.
