

UNITAN PS

Polycondensated Phenolsulphonic Acid based
Syntan

Typical Analysis

Appearance	: Yellowish Fine
Powder	
pH (10% sol.)	: 7.0 ± 0.5
Active Substance	: $94 \% \pm 2$
Ionic Character	: Anionic

Properties

Unitan PS is recommended for retanning of every kind of chrome tanned leathers, which are destined for garment and shoe-upper articles production. It can be used after neutralization in a new float, or at the end of the fatliquoring process in the same float. **Unitan PS** supplies a good fullness and fine grain to the leather.

Application

Unitan PS can be used between 2-4 % on sheep skins garment leathers and between 3-6 % on shoe-upper leathers of shaved weight.
